

Oleksandr Burdun - Tech Lead Resume

Summary

Hands-on technical leader who steps into overloaded or under-owned systems and moves them to the next stage: from hardcoded to configurable, from stalled to shipped, from manual to automated. Strong at setting technical direction, aligning client/backend contracts, and raising code quality while keeping delivery practical.

Recent scope: mentored and consulted 10+ engineers across multiple feature teams as the local architect for a large Match-3 title; led a 12-person cross-functional team to ship a five-month turnaround of a legacy title reskin to global launch.

Architect who builds what he designs. Comfortable owning end-to-end technical slices across Unity client, backend integration, tooling, and CI/CD-favoring maintainability, performance, and reducing long-term risk.

Effective at cross-team coordination and stakeholder communication under tight deadlines; improves engineering workflows and CI/CD to accelerate safe iteration.

Experience

Independent Software Architect / Product Builder

2019 - Present · Personal R&D alongside full-time leadership roles

Independent Software Architect / Product Builder 2019 - Present

- Built Book Pipeline, an AI-assisted publishing workflow using embeddings, vector search, RAG, and multi-agent review pipelines.
- Created a reusable Markdown-to-Telegram publishing platform with a REST API for rich-text/media publishing; now shared infrastructure across multiple apps.
- Designed and operated self-hosted dev infrastructure: containerized services, CI/CD, monitoring, backups, and deployment automation.
- Prototyped AI-native engineering workflows with LLMs, agent orchestration (MCP-compatible services), and retrieval pipelines to evaluate technology before adoption.
- Modernized the piCorePlayer UI with JiveMax (C/C++/Lua): responsive UI across multiple hardware targets; Dockerized build and GitHub Actions for automated cross-platform releases.
- Skills: Go; TypeScript; Python; Docker; PostgreSQL/pgvector; Qdrant; Redis; Kafka; GitHub Actions; OpenAI API; Claude/Cursor/Codex; MCP; Multi-Agent Systems / RAG; C/C++/Lua

Playtika - Kyiv, Ukraine (Hybrid)

Full-time · 2 yrs 5 mos

Group Manager Mar 2025 - Jan 2026 · 11 mos Stepped into an unowned, multi-department POC where reported progress wasn't production-ready. Established clear ownership, audited reality, re-scoped, and drove a feature-cut reskin of a 2012-era title to global launch in five months with a 12-person cross-functional team.

- Delivered a complete reskin/gameplay adaptation while maintaining compatibility with legacy systems.
- Redesigned engineering-outsourced art collaboration/validation to reduce review cycles and rework.
- Implemented a new tutorial framework from scratch, improving onboarding flexibility and metrics.
- Automated synchronization between project and parent codebase; parts were later adopted pipeline-wide.
- Contributed (not owner) to cross-team AI-driven content-automation initiative; aligned team workflows with generative tooling.
- Coordinated across art, QA, analytics, and LiveOps to maintain velocity and quality under deadline.
- Skills: TypeScript; Java; TeamCity; Team Leadership; AI-Assisted Development; Delivery Ownership / Turnaround

Technical Lead Sep 2023 - Mar 2025 · 1 yr 7 mos

- Led technical direction/architecture for a large Match-3 title; mentored/consulted 10+ engineers across several feature teams as the local architect for system design, code quality, and maintainability.
- Refactored monetization from hardcoded client JSON to a backend-driven, versioned system with controlled rollouts/rollbacks and a custom back-office-enabling dozens of safe economy iterations per day instead of monthly, eliminating client-build version/date collisions.
- Drove multiple complex feature launches spanning Unity client and backend microservices.
- Among the more active internal advocates for AI-assisted tooling; helped introduce it into team workflows.
- Improved TeamCity-based CI/CD for faster build validation and deployment cycles.
- Skills: Unity; Java; Jenkins; TeamCity; AI-Assisted Development

Project Ukraine - Kyiv, Ukraine (Remote)

Senior Software Engineer Apr 2022 - Jul 2023 · 1 yr 4 mos

- Owned architecture/technical foundation for an iOS-only 3D platformer/metroidvania.
- Built character control from scratch with MVC-style separation; authored a clean, extensible state machine for adding new logical/animated states safely.
- Shipped an original visualization system: an infinite, explorable knowledge graph fully built in VFX Graph.
- Contributed gameplay tooling for world development (physics, effects, particles) used by designers.
- Implemented several Burst-based performance-critical features.
- Set up CI/CD with Unity Cloud, Bash, and GitHub Actions.
- Skills: Unity; iOS Development; Software Architecture; MVC / State Machine Design; Visual Effects; Particle Effects; CI/CD

Funzy Games - Kyiv, Ukraine

Senior Software Engineer Aug 2021 - Apr 2022 · 9 mos

- Implemented new bubble types and refactored complex existing ones for a live bubble-shooter.
- Participated in a targeted refactor of the bubble system to resolve race conditions/perf issues-migrated flows to CancellationTokens and a more SOLID, component-based architecture (a point fix, not a rewrite).
- Contributed to broader architecture improvements as part of a wider team effort.
- Skills: Unity; iOS Development; Android Development; Software Architecture; Concurrency / Race-Condition Debugging; CI/CD

Playtika - Kyiv, Ukraine

6 years 2 months

Development Team Lead Feb 2017 - Aug 2019 · 2 yrs 7 mos

- Organized the front-end development department in Kyiv from scratch-grew from a single developer to ~50 people across multiple self-managed agile teams.
- Built an onboarding/knowledge-distribution model that cut ramp-up to 2-3 days (vs. 3-8 weeks elsewhere) without proportional management overhead.
- Skills: Xamarin; .NET; C#; Java; CI/CD; Native Android; Native iOS; Org Design / Knowledge-Sharing Systems

Project Team Lead May 2015 - Feb 2017 · 1 yr 10 mos

- Led Dice Legends from zero to launch with a 5-person team in 8 months; reached Top-5 in its Android category shortly after release.
- Proved microservices with Docker on this project, catalyzing a broader company-wide architectural shift that later became standard.
- Skills: Unity 3D; .NET; C#; Java; CI/CD; Native Android; Native iOS; Microservices / Docker

Senior Software Engineer Jul 2013 - May 2015 · 1 yr 11 mos

- AS3 developer contributing to the launch of a Video Poker plugin inside Caesars Casino.
- Served at times as a client-side CTO assistant for rapid prototyping (3-5 prototypes) to de-risk ideas within a day-examples included shifting heavy animation workloads from CPU to GPU.
- Independently built and launched Farkle Pro on Facebook and adapted it for three Russian social networks.
- Skills: AS3; PHP/HTML/JS/CSS; Java; CI/CD (Ant, Maven, TeamCity); Rapid Prototyping / Technical De-Risking; Rendering Optimization

Early Career

- Go Games Ltd - Senior Software Engineer (May 2012 - Jun 2013, Kyiv): Live Go Fishing features; tech lead for Find Object (~3 people); contributor on a ~10-person project; transitioned to Playtika as the company pivoted. Skills: AS3; C#/ASP.NET; MSSQL; MongoDB; Photoshop; Flash Editor Scripting; Tech Leadership (small team)
- Addicted - Software Engineer (Aug 2011 - May 2012, Ryazan): Built two city-builder social games across Facebook/VK/Odnoklassniki in a 4-person team. Skills: AS3; Python; SQL; MongoDB; Redis; Debian/Ubuntu Administration
- Freelance - Technical Project Coordinator / Developer (Nov 2008 - 2012, Kyiv): Coordinated larger freelance projects, assembled teams, and developed across AS3 and web stacks.
- New Project - Project Manager (Nov 2007 - Nov 2008, Kyiv): Led ERP implementation; modeled processes in IDEF0/IDEF3; built a custom 1C UTP configuration and trained users.
- ExpertSoft - Project Manager / Consultant / Sales (Aug 2006 - Nov 2007, Kyiv): Delivered/consulted on 1C UTP systems for automotive retail/service; software sales.

Skills

- Architecture & Leadership
 - Technical leadership; system design; code quality; mentoring; delivery ownership/turnaround
 - Cross-team coordination; stakeholder communication; rapid prototyping; knowledge-sharing systems
- Game/Client Engineering
 - Unity; C#; MVC/state machines; VFX Graph; Burst; iOS; Android; rendering optimization
- Backend & Data
 - Microservices; Docker; PostgreSQL/pgvector; Qdrant; Redis; Kafka; Java; .NET; C#/ASP.NET; MSSQL; MongoDB
- AI & Automation
 - AI-assisted development; Multi-Agent Systems; RAG; MCP; OpenAI API; Claude/Cursor/Codex
- CI/CD & Tooling
 - TeamCity; Jenkins; GitHub Actions; Unity Cloud; Bash; containerized dev infra; deployment automation
- Languages & Low-level
 - Go; TypeScript; Python; C/C++/Lua; AS3; PHP/HTML/JS/CSS
