

Oleksandr Burdun - CTO Resume

Summary

I specialize in turning underpowered engineering functions into scalable, predictable organizations. Most effective where a product or team has outgrown its current stage, I design the structure, workflows, and technical guardrails that unlock the next level of delivery.

Built a front-end department from one person to ~50 across multiple cross-functional agile teams, with an onboarding model that cut ramp time from 3 - 8 weeks to 2 - 3 days and scaled without proportional management overhead.

Drive execution turnarounds and align technology with business outcomes: led a 12-person cross-functional team to ship a global reskin of a legacy title in 5 months after auditing and resetting an unowned, multi-POC effort; re-architected a hardcoded monetization system into a configurable, backend-driven capability enabling dozens of safe live-economy iterations per day.

Operate cross-functionally with product, art/design, QA, analytics, and LiveOps; combine organizational design and delivery systems with high-level architectural direction. Step hands-on when needed to unblock execution, improve CI/CD, de-risk with rapid prototypes, and introduce AI-assisted workflows credibly.

Experience

Independent Software Architect / Product Builder

2019 - Present · Personal R&D alongside full-time leadership roles

- Build and operate reusable internal platforms and infrastructure; validate emerging approaches (LLMs, agent orchestration, retrieval pipelines) through working prototypes before proposing team adoption.
- Selected projects: AI-assisted “Book Pipeline” for transforming large knowledge bases into structured drafts; Markdown-to-Telegram publishing platform (REST); JiveMax - modernization of piCorePlayer UI with multi-architecture embedded work and automated cross-platform builds.
- Skills: Go, TypeScript, Python, Docker, PostgreSQL/pgvector, Qdrant, Redis, Kafka, GitHub Actions, OpenAI API, Claude/Cursor/Codex, MCP, Multi-Agent Systems/RAG, C/C++/Lua

Playtika - Kyiv, Ukraine (Hybrid)

Full-time · 2 yrs 5 mos

Group Manager Mar 2025 - Jan 2026 · 11 mos

Inherited a project misperceived as near-ready after multiple unowned POCs across departments. Established single-threaded ownership, audited true delivery state, re-scoped to a high-impact reskin, and shipped a global launch of a 2012-era title in 5 months, then transitioned it into standard operations.

- Led a 12-person cross-functional team from technical setup and design adaptation through live-ops readiness; delivered a complete reskin and gameplay adaptation compatible with legacy systems.
- Redesigned collaboration and validation with outsourced art to cut review cycles and rework.
- Implemented a new tutorial framework from scratch to improve onboarding metrics and content flexibility.
- Automated synchronization with the parent codebase; elements were later adopted into the broader engineering pipeline.
- Contributed (not owner) to a cross-team AI-driven dynamic content initiative, aligning production workflows with generative tooling.
- Coordinated with art, QA, analytics, and LiveOps to maintain velocity and quality under tight deadlines.
- Skills: TypeScript, Java, TeamCity, Team Leadership, AI-Assisted Development, Delivery Ownership/Turnaround

Technical Lead Sep 2023 - Mar 2025 · 1 yr 7 mos

- Led technical direction and architecture for a large Match-3 title; mentored/consulted 10+ engineers across multiple feature teams as a “local architect.”
- Refactored monetization from hardcoded client JSON to a backend-driven, versioned, rollback-capable system with a custom back-office - enabling dozens of safe live-economy iterations per day instead of rare client-bound updates and eliminating version/date collisions.
- Drove complex feature launches across Unity client and backend microservices; improved CI/CD in TeamCity for faster validation and deployments.
- Acted as one of several internal advocates for AI-assisted tooling and workflow introduction.
- Skills: Unity, Java, Jenkins, TeamCity, AI-Assisted Development

Project Ukraine - Kyiv, Ukraine (Remote)

Senior Software Engineer Apr 2022 - Jul 2023 · 1 yr 4 mos

- Owned architecture and technical foundation of an iOS-only 3D platformer/metroidvania.
- Built a clean MVC/state-machine character system decoupling movement math from visuals; added new states without touching unrelated code.
- Created an original VFX-Graph-based infinite knowledge-graph visualization; contributed gameplay tooling for physics/effects; set up CI/CD with Unity Cloud, Bash, and GitHub Actions.
- Skills: Unity, iOS Development, Software Architecture, MVC/State Machine Design, Visual/Particle Effects, CI/CD

Funzy Games - Kyiv, Ukraine

Senior Software Engineer Aug 2021 - Apr 2022 · 9 mos

- Implemented and refactored complex gameplay bubbles; participated in a targeted refactor to resolve race conditions and performance issues via CancellationTokens and more SOLID, componentized flows.
- Contributed to broader architecture improvements as part of a team effort; supported CI/CD.
- Skills: Unity, iOS Development, Android Development, Software Architecture, Concurrency/Race-Condition Debugging, CI/CD

Playtika - Kyiv, Ukraine

6 years 2 months

Development Team Lead Feb 2017 - Aug 2019 · 2 yrs 7 mos

- Organized the Kyiv front-end department from scratch; scaled from a single developer to ~50 across multiple cross-functional, self-managed agile teams.
- Designed an onboarding and knowledge-distribution model that reduced ramp-up to 2 - 3 days (vs. 3 - 8 weeks elsewhere) and enabled continued growth without proportional management overhead.
- Skills: Xamarin, .NET, C#, Java, CI/CD, Native Android Development, Native iOS Development, Org Design/Knowledge-Sharing Systems

Project Team Lead May 2015 - Feb 2017 · 1 yr 10 mos

- Led Dice Legends from zero to Android launch with a 5-person team in 8 months; reached Top-5 in its Android category shortly after launch.
- Proved a microservices approach using Docker on this project, catalyzing a broader scaling effort that later became part of Playtika's standard architecture at company scale.
- Skills: Unity 3D, .NET, C#, Java, CI/CD, Native Android Development, Native iOS Development, Microservices/Docker

Senior Software Engineer Jul 2013 - May 2015 · 1 yr 11 mos

- Contributed to launching a Video Poker plugin inside Caesars Casino; served as a rapid-prototyping “client-side CTO assistant,” delivering 3 - 5 prototypes (logic frameworks and rendering optimizations, including CPU-to-GPU shifts) within single-day cycles to de-risk ideas for greenlighting.
- Independently built and launched Farkle Pro on Facebook and three Russian social networks.
- Skills: AS3, PHP/HTML/JS/CSS, Java, CI/CD (Ant, Maven, TeamCity), Rapid Prototyping/Technical De-Risking, Rendering Optimization

Early Career

- Go Games Ltd - Senior Software Engineer (May 2012 - Jun 2013): Built core features on a live title; stepped up as tech lead on a ~3-person project; contributed to a ~10-person project; moved on as the company pivoted.
- Addicted - Software Engineer (Aug 2011 - May 2012): Built two city-builder social games; helped launch one from scratch as part of a four-person team.
- Freelance - Technical Project Coordinator/Developer (Nov 2008 - 2012): Assembled teams for larger freelance projects, bridging customers and developers while contributing code.
- New Project - Project Manager (Nov 2007 - Nov 2008): Led ERP implementation; formalized business processes with IDEF0/IDEF3; built a custom 1C UTP configuration and trained users.
- ExpertSoft - Consultant/Project Manager/Sales Manager (Aug 2006 - Nov 2007): Delivered/managed auto-retail/service systems on 1C UTP for a Mazda dealer and related clients.

Skills

- Leadership & Organization
 - Team Leadership; Org Design/Knowledge-Sharing Systems; Project Management; Delivery Ownership/Turnaround; Rapid Prototyping/Technical De-Risking
- Architecture & Platforms
 - Software Architecture; Microservices/Docker; Unity/Unity 3D; .NET/C#; Java; TypeScript; Xamarin; Native iOS/Android Development
- AI & Data
 - AI-Assisted Development; Multi-Agent Systems/RAG; MCP; OpenAI API; Claude/Cursor/Codex; PostgreSQL/pgvector; Qdrant; Redis; Kafka
- DevOps & CI/CD
 - CI/CD (TeamCity, Jenkins, GitHub Actions, Unity Cloud); Docker; Bash; Deployment Automation; Monitoring/Backups
- Modeling & Business Systems
 - Business Process Modeling (IDEF0, IDEF3); ERP Implementation; 1C:Enterprise (UTP configuration)
- Programming Languages
 - Go; TypeScript; Python; C/C++/Lua; AS3; PHP/HTML/JS/CSS
- Certifications
 - Multi-Agent Systems; Financial Modeling coursework/certification; Scrum training/certification (issuers/dates to confirm)
