

Oleksandr Burdun - Tech Lead Resume

Summary

Hands-on technical leader and system architect with a track record of setting technical direction, raising code quality, and shipping complex products across Unity clients and backend services.

Known for unblocking ambiguous or stalled initiatives and driving them to launch under tight timelines-e.g., led a 12-person cross-functional team to deliver a 5-month global reskin of a legacy 2012-era title; mentored and consulted 10+ engineers across multiple feature teams as a local architect.

Pragmatic architecture focus: refactors that reduce long-term risk and boost iteration speed (e.g., turning a hard-coded client-bound monetization system into a safe, backend-driven capability); alignment across client, backend, tooling, and delivery.

Strength in cross-team coordination (art, QA, analytics, LiveOps) and workflow improvements, including CI/CD acceleration and automation that reduces friction and rework.

Experience

Playtika - Kyiv, Ukraine (Hybrid)

Full-time · 2 yrs 5 mos

Group Manager Mar 2025 - Jan 2026 · 11 mos

- Took ownership of an unowned, overestimated multi-department POC; audited true delivery state, re-scoped, and drove a feature-cut reskin of a large legacy 2012-era title to global launch in 5 months.
- Led a 12-person cross-functional team end-to-end, from technical setup and design adaptation to live-ops readiness.
- Implemented a new tutorial framework from scratch, improving onboarding flexibility and metrics.
- Automated synchronization between the project and parent codebase; parts were later folded into the broader engineering pipeline.
- Contributed (not owner) to a cross-team AI-driven automation initiative to align production workflows with generative tooling.
- Coordinated closely with art, QA, analytics, and LiveOps to maintain velocity and quality under tight deadlines.
- Skills: TypeScript; Java; TeamCity; Team Leadership; AI-Assisted Development; Delivery Ownership / Turnaround

Technical Lead Sep 2023 - Mar 2025 · 1 yr 7 mos

- Led technical direction and architecture for a large Match-3 title; mentored and consulted 10+ engineers across multiple feature teams.
- Refactored the monetization system from hardcoded client JSON to a backend-driven, versioned solution with controlled rollouts, rollback, and dynamic updates via a custom back office-enabling dozens of safe iterations per day instead of rare client-bound changes.
- Drove complex feature launches spanning Unity client and backend microservices alignment.
- Among the more active internal advocates for AI-assisted tooling adoption.
- Improved CI/CD in TeamCity to accelerate build validation and deployments.
- Skills: Unity; Java; Jenkins; TeamCity; AI-Assisted Development

Project Ukraine - Kyiv, Ukraine (Remote)

Senior Software Engineer Apr 2022 - Jul 2023 · 1 yr 4 mos

- Owned architecture and technical foundation for an iOS-only metroidvania/platformer built in a 3D world.
- Built a decoupled character system (MVC-style) and extensible state machine enabling new states without unrelated code changes.
- Shipped an original, infinite knowledge-graph visualization system entirely in VFX Graph.

- Delivered gameplay tooling for physics, effects, and particles; implemented several Burst-based performance-critical features.
- Set up CI/CD with Unity Cloud, Bash, and GitHub Actions.
- Skills: Unity; iOS Development; Software Architecture; MVC / State Machine Design; Visual Effects; Particle Effects; Continuous Integration and Continuous Delivery (CI/CD)

Funzy Games - Kyiv, Ukraine

Senior Software Engineer Aug 2021 - Apr 2022 · 9 mos

- Implemented new gameplay-specific bubble types and refactored complex existing ones in a bubble shooter.
- Participated in (did not own) a targeted refactor to resolve race conditions/performance issues using CancellationTokens and a more SOLID, component-based architecture.
- Contributed to broader architecture improvements as part of the team's ongoing efforts.
- Skills: Unity; iOS Development; Android Development; Software Architecture; Concurrency / Race-Condition Debugging; Continuous Integration and Continuous Delivery (CI/CD)

Playtika - Kyiv, Ukraine

6 years 2 months

Development Team Lead Feb 2017 - Aug 2019 · 2 yrs 7 mos

- Organized the front-end development function from 1 person to ~50 across multiple cross-functional, self-managed agile teams.
- Designed a distributed onboarding model that reduced ramp-up from 3-8 weeks to 2-3 days and enabled growth without proportional management overhead.
- Skills: Xamarin; .NET; C#; Java; CI/CD; Native Android Development; Native iOS Development; Org Design / Knowledge-Sharing Systems

Project Team Lead May 2015 - Feb 2017 · 1 yr 10 mos

- Led Dice Legends from scratch to Android launch with a 5-person team in 8 months; the title reached Top-5 in its category shortly after launch.
- Proved a microservices approach with Docker on this project, informing broader company scaling that later became standard architecture.
- Skills: Unity 3D; .NET; C#; Java; CI/CD; Native Android Development; Native iOS Development; Microservices / Docker

Senior Software Engineer Jul 2013 - May 2015 · 1 yr 11 mos

- Contributed to launching a Video Poker plugin inside Caesars Casino.
- Served as a client-side CTO assistant for rapid prototyping: delivered 3-5 one-day prototypes de-risking logic frameworks and rendering optimizations (including CPU-to-GPU shifts).
- Independently built and launched Farkle Pro on Facebook and adapted it for three Russian social networks.
- Skills: AS3; PHP/HTML/JS/CSS; Java; CI/CD (Ant, Maven, TeamCity, etc.); Rapid Prototyping / Technical De-Risking; Rendering Optimization

Early Career

- Go Games Ltd - Senior Software Engineer (May 2012 - Jun 2013): Core features on a live Go Fishing title; acted as tech lead for Find Object (~3 people); contributed to a second ~10-person project; backend/tools in C#/ASP.NET, MSSQL, MongoDB.
- Addicted - Software Engineer (Aug 2011 - May 2012): Built two city-builder social games across Facebook/VK/Odnoklassniki; part of a 4-person team for a greenfield title.
- Freelance - Technical Project Coordinator / Developer (Nov 2008 - 2012): Combined development with coordinating teams and client communication on larger projects.

- New Project - Project Manager (Nov 2007 - Nov 2008): Led ERP implementation; formalized processes with IDEF0/IDEF3; built a custom 1C UTP configuration.
- ExpertSoft - Consultant / Project Manager / Sales Manager (Aug 2006 - Nov 2007): Delivery and sales around automotive service/parts systems on 1C UTP.

Skills

- Technical Leadership & Delivery
 - Team Leadership; Mentoring; Delivery Ownership / Turnaround; Org Design / Knowledge-Sharing Systems; Cross-team Coordination; Rapid Prototyping / Technical De-Risking
- Architecture & Platforms
 - Software Architecture; Microservices / Docker; MVC / State Machine Design; Rendering Optimization; Concurrency / Race-Condition Debugging
- Game & Client Development
 - Unity; iOS Development; Android Development; Visual Effects; Particle Effects; Unity Cloud
- Backend & Languages
 - .NET; C#; Java; TypeScript; AS3; PHP/HTML/JS/CSS
- CI/CD & Tooling
 - TeamCity; Jenkins; GitHub Actions; CI/CD (Ant, Maven, TeamCity, etc.)
- AI-Assisted Development
 - AI-Assisted Development (advocacy and workflow integration within teams)
